

4045TFU70 Diesel Engine

for Generator Set Applications

General data

Model	4045TFU70
Number of cylinders	4
Displacement - L (cu in)	
Bore and stroke - mm (in)106 x 127	(4.19 x 5.00)
Compression ratio	17.0 : 1
Engine typeIn-L	ine, 4-Cycle

AspirationT	urbocharged
Length – mm (in)	-
Width – mm (in)6	59,8 (25,98)
Height – mm (in)104	1,85 (41,02)
Weight, dry – kg (lb)	450 (992)

Corresponding bare engine4045TF270

Ratings

Prime power at 50 Hz (1500 rpm)	55 kW (74 hp)
Standby power at 50 Hz (1500 rpm)	61 kW (81 hp)

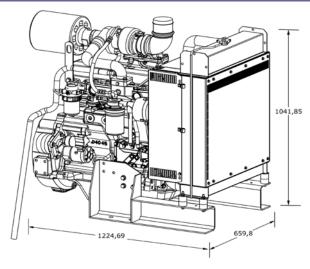

Prime power is the nominal power an engine is capable of delivering with a variable load for an unlimited number of hours per year. This rating conforms to ISO 3046 and SAE J1995.

Standby power is the nominal engine power available at varying load factors for up to 500 hours per year. This rating conforms to ISO 3046 and SAE J1995. The calculated generator set rating range for standby applications is based on minimum engine power (nominal -5%) to provide 100% meet-or-exceed performance for assembled standby generator sets.

Certification

• EU Stage II

Dimensions

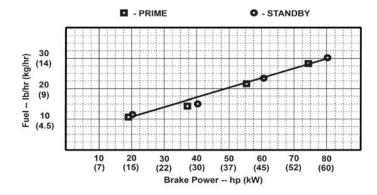

Dimensions : mm Weight : 450 kg

for Generator Set Applications

Performance curve

Features and benefits

Dynamically Balanced Crankshaft

- Induction-hardened journals for long hours of reliable service
- Robust design to drive machinery from the front of the crankshaft
- Supported by five main bearings

Forged-Steel Connecting Rods

 45-degree connecting rod/cap-joint design allows the use of large connecting rod bearings for increased durability

Replaceable Wet-type Cylinder Liners

- Provide excellent heat dissipation
- Precision machined for long life
- Rebuild to original specifications

Compact Size

- Short length is ideal for both skid and packaged installations
- High mount or low mount turbocharger position to meet packing requirements

World-class Performance

• Excellent fuel economy and low oil consumption

Fuel System Controls

- Proven and reliable Mechanical Governer
- 3-5% Droop Governing
- 12V or 24V Electric Shutoff

Smooth Operation

• Smooth vibration with full length engine balancers

Easy to Apply, Easy to Install

- Front and rear engine mounting pads on the side of the block facilitates installations
- Either side service for filters and service points
- All connection points in common locations make it easy to install or package
